A Taxonomic Revision Of The South African Endemic Genus

This is likewise one of the factors by obtaining the soft documents of this **a taxonomic revision of the south african endemic genus** by online. You might not require more period to spend to go to the book creation as without difficulty as search for them. In some cases, you likewise attain not discover the broadcast a taxonomic revision of the south african endemic genus that you are looking for. It will agreed squander the time.

However below, subsequently you visit this web page, it will be as a result no question easy to acquire as with ease as download guide a taxonomic revision of the south african endemic genus

It will not endure many grow old as we explain before. You can reach it though produce an effect something else at house and even in your workplace. in view of that easy! So, are you question? Just exercise just what we pay for under as well as evaluation **a taxonomic revision of the south african endemic genus** what you subsequently to read!

Taxonomic Revision Of The

A taxonomic revision or taxonomic review is a novel analysis of the variation patterns in a particular taxon. This analysis may be executed on the basis of any combination of the various available kinds of characters, such as morphological, anatomical, palynological, biochemical and genetic.

Taxonomy (biology) - Wikipedia

Abstract. A taxonomic revision of the genus *Chaquihua* is presented confronting new material with the literature descriptions of the genus. The nymph and male imago are described here for the first time and the existing descriptions of other developmental stages are complemented. Association of larvae and winged stages is now confirmed by rearing.

Taxonomic revision of the genus *Chaquihua*

The genus *Scedosporium* (previously also *Pseudallescheria*) has undergone a major taxonomic revision in the last decade on the basis of phylogenetic analysis and simplification of nomenclature.

Taxonomic Revisions - an overview | ScienceDirect Topics

The primary objective of a revision is to take an established taxonomic classification and, based upon novel data analysis, synthesise a novel ("revised") classification. Thus during the course of a revision a fundamental alteration occurs between the initial and the novel classification, i.e. new taxa may be formed, taxonomic limits

Towards Defining a Taxonomic Revision Methodology

A taxonomic revision of *Catalpa* (*Bignoniaceae*), a genus of perennial trees frequently used in horticulture as garden and street trees, is provided. Eight natural species and two hybrid species are ...

(PDF) Taxonomic revision of the genus *Catalpa* (*Bignoniaceae*)

The taxonomic revision within *Leiothrichidae* has been treated in another paper (Cibois et al., 2018). However, the comprehensive phylogeny presented here highlighted the particularity of the genus *Alcippe*, whose

position relative to Leiothrichidae and Pellorneidae is not unanimously strongly supported in our analyses (see Section 4.1), and also varies among other studies (Gelang et al ...

Near-complete phylogeny and taxonomic revision of the ...

The genus *Lactarius* Pers. (Russulales) is a cosmopolitan group of Basidiomycota that forms ectomycorrhizal relationships primarily with both deciduous and coniferous trees. Although the genus has been well-studied in Europe and North America, only fragmentary researches have been carried out on Asian species. In particular, the distribution of *Lactarius* species in South Korea is poorly ...

This systematic study documents the taxonomy, diversity, and distribution of the tarantula spider genus *Aphonopelma* Pocock, 1901 within the United States. By employing phylogenomic, morphological, and geospatial data, we evaluated all 55 nominal species in the United States to examine the evolutionary history of *Aphonopelma* and the group's taxonomy by implementing an integrative approach to ...

Taxonomic Revisions ☐ Revisions are presentations of new material or new interpretations that have been integrated with previous knowledge through summary reevaluation.

Kinds of taxonomic publications, taxonomic review , revision ...

We present the first comprehensive taxonomic revision and review the biology of the olingos, the endemic Neotropical procyonid genus *Bassaricyon*, based on most specimens available in museums, and with data derived from anatomy, morphometrics, mitochondrial and nuclear DNA, field observations, and geographic range modeling. Species of *Bassaricyon* are primarily forest-living, arboreal, nocturnal ...

This is the first revision in nearly 130 years of the African genus *Pseudohydrosme*, formerly considered endemic to Gabon. Sister to *Anchomanes*, *Pseudohydrosme* is distinct from *Anchomanes* because of its 2-3-locular ovary (not unilocular), peduncle concealed by cataphylls at anthesis and far shorter than the spathe (not exposed, far exceeding the spathe), stipitate fruits and viviparous ...

Taxonomic revision of the threatened African genus ...

Dasypus is the most speciose genus of the order Cingulata, including approximately 40% of known living armadillos. Nine species are currently recognized, although comprehensive analyses of the entire genus have never been done. Our aim is to revise the taxonomy of the long-nosed armadillos and properly define the taxa. We examined 2126 specimens of *Dasypus* preserved in 39 different museum ...

Taxonomic revision of the long-nosed armadillos, Genus ...

The first modern, comprehensive revision of this genus recognizing 27 species is presented here. *Werneria heteroloba* and *W. obtusiloba* are synonymized with *W. pinnatifida*, and *W. acerosifolia* is synonymized with *W. staticifolia*. Moreover, five infraspecific names and three supraspecific names are synonymized.

A recent comprehensive revision of the taxonomy that underpins the global IUCN Red List for birds led to an increase of 10.7% (over 1000 species) in the number of recognized bird species. We assessed the implications for conservation of this revision by (1) comparing extinction risk between newly recognized and unrevised species, (2) calculating the extent to which newly recognized species' ranges are covered by Important Bird and Biodiversity Areas (IBAs) and protected areas, and (3) ...
