CCNA 1 v7 Exam Answers - Introduction to Networks v7.0 (ITN)  
A crossover cable is used to interconnect similar devices together like switch to a switch, a host to a host, or a router to a router. If a switch has the MDIX capability, a crossover could be used to connect the switch to the router; however, that option is not available. A rollover cable is used to connect to a router or switch console port. 7.
