OK anyone on here have an outlook monitor on a manual? I have the outlook monitor on my '01 with the 6-speed and have some strange issues with it. When accelerating it jumps, like it starts out in a lower power setting and then steps up to a higher power setting. I have sent it back twice and talked to Bully Dog several times.

I am hoping Bully Dog fixes this cause I really like the idea of the outlook monitor. On a side note when I talked to them there is a known problem they are working on with the high boost display on the 7.3Ls. Since this could be related to my problem I am wondering if they have a programming problem with how the outlook handles the MAP signal.
