The Student Solutions Manual to accompany Rogawski's Single Variable Calculus: Early Transcendentals offers worked-out solutions to all odd-numbered exercises in the text.

The Student Solutions Manual to accompany Rogawski's Single Variable Calculus: Early Transcendentals offers worked-out solutions to all odd-numbered exercises in the text.

This new text presents calculus with solid mathematical precision but with an everyday sensibility that puts the main concepts in clear terms. It is rigorous without being inaccessible and clear without being too informal—it has the perfect balance for instructors and their students. "We (my AP Calculus students and I) are enjoying Rogawski's text—very much, in fact. I've asked my students to do a "compare and contrast" with the Rogawski text versus our "regular" textbook, and each time, the students were unanimous in their positive attitudes towards Rogawski's material." - Glen Vest, Ritenour High School (MO)

Appropriate for the third semester in the college calculus sequence, the Fourth Edition of Multivariable Calculus maintains the student-friendly writing style and robust exercises and problem sets that Dennis Zill is famous for. Ideal as a follow-up companion to Zill's first volume, or as a stand-alone text, this exceptional revision presents the topics typically covered in the traditional third course, including Vector-Valued Functions, Differential Calculus of Functions of Several Variables, Integral Calculus of Functions of Several Variables, Vector Integral Calculus, and an Introduction to Differential Equations.
