In the last few years, digital SLR cameras have taken the astrophotography world by storm. It is now easier to photograph the stars than ever before! They are compact and portable, flexible to adapt with different lenses and for telescope use, and above all DSLR cameras are easy and enjoyable to use. In this concise guide, experienced astrophotography expert Michael Covington outlines the simple, enduring basics that will enable you to get started, and help you get the most from your equipment. He covers a wide selection of equipment, simple and advanced projects, technical considerations and image processing techniques. Unlike other astrophotography books, this one focuses specifically on DSLR cameras, not astronomical CCDs, non-DSLR digital cameras, or film. This guide is ideal for astrophotographers who wish to develop their skills using DSLR cameras and as a friendly introduction to amateur astronomers or photographers curious about photographing the night sky.

From the early cities in the second millennium BC to the Aztec capital of Tenochtitlan on the eve of the Spanish conquest, Ancient Mesoamericans created landscapes full of meaning and power in the center of their urban spaces. The sixteenth century description of Tenochtitlan by Bernal Diaz del Castillo and the archaeological remnants of Teotihuacan attest to the power and centrality of these urban configurations in Ancient Mesoamerican history. In Landscape and Power in Ancient Mesoamerica, Rex Koontz, Kathryn Reese-Taylor, and Annabeth Headrick explore the cultural logic that structured and generated these centers.Through case studies of specific urban spaces and their meanings, the authors examine the general principles by which the Ancient Mesoamericans created meaningful urban space. In a profoundly interdisciplinary exchange involving both archaeologists and art historians, this volume connects the symbolism of those landscapes, the performances that activated this symbolism, and the cultural poetics of these ensembles.
