"Prealgebra is designed to meet scope and sequence requirements for a one-semester prealgebra course. The text introduces the fundamental concepts of algebra while addressing the needs of students with diverse backgrounds and learning styles. Each topic builds upon previously developed material to demonstrate the cohesiveness and structure of mathematics. Prealgebra follows a nontraditional approach in its presentation of content. The beginning, in particular, is presented as a sequence of small steps so that students gain confidence in their ability to succeed in the course. The order of topics was carefully planned to emphasize the logical progression throughout the course and to facilitate a thorough understanding of each concept. As new ideas are presented, they are explicitly related to

previous topics."--BC Campus website.

"Add a dimension to your knowledge. With Curren's Dimensional Analysis for Meds, Third Edition, you find out just how easy it can be to calculate dosages correctly. No prior knowledge of calculation is necessary, as a building-block organization is employed to cover basic facts and tips regarding drug measures, reading medication labels, and syringe calibrations. Once competency is established, more complex concepts are presented, such as intravenous and pediatric calculations, as well as numerous opportunities to practice your new skills. A conversational style accompanies this effective learning progression, revealing Dimensional Analysis for Meds as simply the most effective tool for learning dosage calculations."--BOOK JACKET.
