In practice, due to many possible combinations of components and product modules, the problem becomes computationally complex, which calls for more efficient and effective optimization methods.

A Modular Product Design Approach for Sustainable ...

Personally, I have worked on several smaller attempts at modular product design that did not go so well, both in the computer hardware and software domains. Nevertheless, the book is well written. My hope is that the authors (with the benefit of additional experience since they wrote this book) will write a second edition that takes on some of these ugly "paint yourself into a corner" problems ...

Controlling Design Variants Modular Product Platforms ...

Modular product architectures offer a solution to face this threat by more efficiently controlling a company's internal complexity [Baldwin and Clark 2006]. A modular product family is created by decomposing existing products into modules, which are several smaller structural elements that can be managed more easily [Jose and Tollenaere 2005].
