This biography of Jacques Derrida (1930–2004) tells the story of a Jewish boy from Algiers, excluded from school at the age of twelve, who went on to become the most widely translated French philosopher in the world – a vulnerable, tormented man who, throughout his life, continued to see himself as unwelcome in the French university system. We are plunged into the different worlds in which Derrida lived and worked: pre-independence Algeria, the microcosm of the École Normale Supérieure, the cluster of structuralist thinkers, and the turbulent events of 1968 and after. We meet the remarkable series of leading writers and philosophers with whom Derrida struck up a friendship: Louis Althusser, Emmanuel Levinas, Jean Genet, and Hélène Cixous, among others. We also witness an equally long series of often brutal polemics fought over crucial issues with thinkers such as Michel Foucault, Jacques Lacan, John R. Searle, and Jürgen Habermas, as well as several controversies that went far beyond academia, the best known of which concerned Heidegger and Paul de Man. We follow a series of courageous political commitments in support of Nelson Mandela, illegal immigrants, and gay marriage. And we watch as a concept – deconstruction – takes wing and exerts an extraordinary influence way beyond the philosophical world, on literary studies, architecture, law, theology, feminism, queer theory, and postcolonial studies. In writing this compelling and authoritative biography, Benoît Peeters talked to over a hundred individuals who knew and worked with Derrida. He is also the first person to make use of the huge personal archive built up by Derrida throughout his life and of his extensive correspondence. Peeters' book gives us a new and deeper understanding of the man who will perhaps be seen as the major philosopher of the second half of the twentieth century.

Philosopher, film star, father of “post truth”—the real story of Jacques Derrida Who is Jacques Derrida? For some, he is the originator of a relativist philosophy responsible for the contemporary crisis of truth. For the far right, he is one of the architects of Cultural Marxism. To his academic critics, he reduced French philosophy to “little more than an object of ridicule.” For his fans, he is an intellectual rock star who ranged across literature, politics, and linguistics. In *An Event, Perhaps*, Peter Salmon presents this misunderstood and misappropriated figure as a deeply humane and urgent thinker for our times. Born in Algiers, the young Jackie was always an outsider. Despite his best efforts, he found it difficult to establish himself among the Paris intellectual milieu of the 1960s. However, in 1967, he changed the whole course of philosophy: outlining the central concepts of deconstruction. Immediately, his reputation as a complex and confounding thinker was established. Feted by some, abhorred by others, Derrida had an exhaustive breadth of interests but, as Salmon shows, was moved by a profound desire to understand how we engage with each other. It is a theme explored through Derrida’s intimate relationships with writers such as Althusser, Genet, Lacan, Foucault, Cixous, and Kristeva. Accessible, provocative and beautifully written, *An Event, Perhaps* will introduce a new readership to the life and work of a philosopher whose influence over the way we think will continue long into the twenty-first century.

The first intellectual biography of 20th century philosopher Jacques Derrida, a full-scale appraisal of his career, his influences, and his philosophical sources.

"Author of the critically acclaimed *Tintin and the World of Hergé* and the last person to interview Remi, Benoit Peeters tells the complete story behind Hergé’s origins and shows how and why the nom de plume grew into a larger-than-Remi personality as Tintin’s popularity exploded. Drawing on interviews and using recently uncovered primary sources for the first time, Peeters reveals Remi as a neurotic man who sought to escape the troubles of his past by allowing Hergé’s identity to subsume his own. As Tintin adventured, Hergé lived out a romanticized version of life for Remi."--Jacket.

Written by experts in their field, this Companion surveys the challenges and provocations raised by the major voices of poststructuralism: Foucault, Deleuze, Derrida, Cixous, Lyotard, Guattari, Kristeva, Irigaray, Barthes and Baudrillard. Thematically organised and clearly written, it will guide students and researchers in philosophy, literature, art, geography, politics, sociology, law, film, and cultural studies around the nature and contemporary relevance of poststructuralism.

In 1966, Jacques Derrida gave a lecture at Johns Hopkins University that cast the entire history of Western Philosophy into doubt. The following year, Derrida published three brilliant but mystifying books that convinced the pollsters that he was the most important philosopher of the late 20th Century. Unfortunately, nobody was sure whether the intellectual movement that he spawned – Deconstruction – advanced philosophy or murdered it. The truth? – Derrida is one of those annoying geniuses you can take a class on, read half-a-dozen books by and still have no idea what he’s talking about. Derrida’s ‘writing’ – confusing doesn’t begin to describe it (it’s like he’s pulling the rug out from under the rug that he pulled out from under philosophy.) But beneath the confusion, like the heartbeat of a bird in your hand, you can feel Derrida’s electric genius. It draws you to it; you want to understand it... but it’s so confusing. What you need, Ducky, is *Derrida For Beginners* by James Powell! Jim Powell’s *Derrida For Beginners* is the clearest explanation of Derrida and deconstruction presently available in our solar system. Powell guides us through blindingly obscure texts like *Of Grammatology* (Derrida’s

deconstruction of Saussure, Lévi Strauss, and Rousseau), “Différance” (his essay on language and life), Dissemination (his dismantling of Plato, his rap on Mallarmé), and Derrida’s other masterpieces (the mere titles can make strong men tremble in terror – Glas, Signéponge/Signsponge, The Post Card, and Specters of Marx.) Readers will learn the coolest Derridian buzzwords (e.g., intertextuality, binary oppositions, hymen, sous rature, arche-writing, phallogocentrism), the high-and-low lights of deconstruction’s history (including the DeMan controversy), and the various criticisms of Derrida and deconstruction, including Camille Paglia’s objection that America, the rock-n-roll nation, isn’t formal enough to need deconstruction. The master, however, begs to disagree: “America is Deconstruction” -Jacques Derrida

The telling of tales is always a troubling business, and the way in which we tell stories about ourselves and about others always involves a degree of ethical risk. Levinas, *Storytelling and Anti-Storytelling* explores the troubling nature of storytelling through a reading of the work of Emmanuel Levinas. Levinas is a thinker who has a complex relationship with literature and with storytelling. At times, Levinas is a teller of powerful tales about ethics; at other times, on ethical grounds, he disavows storytelling altogether. *Storytelling and Anti-Storytelling* explores the tensions between philosophy and storytelling that run throughout Levinas's work. By asking about how Levinas tells and untells his stories, and by risking the telling of tales that Levinas himself does not dare to tell, this book opens up new ways of thinking about Levinas's ethics of responsibility. It may be, as Levinas often insists, that storytelling presents us with ethical dangers; but Levinas, *Storytelling and Anti-Storytelling* makes the case that an ethics of responsibility may demand that, whilst mindful of these dangers, we nevertheless continually seek out new stories to tell about ourselves, about others and about the world.

What is philosophy? A question often asked, but usually in an abstract or speculative way. Rarely do we find a case of ‘philosophy’ being determined in the real world. However, at Cambridge in 1992, this is exactly what happened, as a debate took place over the merits, or otherwise, of awarding an Honorary Doctorate of Letters to the philosopher Jacques Derrida. Derrida’s supporters argued that his deconstruction of Western traditions of thinking ushered in an important new manner of doing philosophy; his detractors dismissed his work as charlatanism, philistinism – and non-philosophy. As arguments raged over the validity of introducing the canon of Continental philosophy to the Humanities in British Higher Education – the so-called ‘Theory Wars’ – Derrida’s ‘Cambridge Affair’ focalized this decisive conflict more than anything else. This is the first study of the Cambridge Affair. Drawing upon archival and unpublished material, little-known texts pertaining to the Affair, and Derrida’s own oeuvre, this original account offers an historical and philosophical reconstruction of this crucial debate, evaluating it against the body of work it put on trial.

‘Jürgen Habermas’, wrote the American philosopher Ronald Dworkin on the occasion of the great European thinker’s eightieth birthday, ‘is not only the world’s most famous living philosopher. Even his fame is famous.’ Now, after many years of intensive research and in-depth conversations with contemporaries, colleagues and Habermas himself, Stefan Müller-Doohm presents the first comprehensive biography of one of the most important public intellectuals of our time. From his political and philosophical awakening in West Germany to the formative relationships with Adorno and Horkheimer, Müller-Doohm masterfully traces the major forces that shaped Habermas’s intellectual development. He shows how Habermas’s life and work were conditioned by the possibilities offered to his generation in the unique circumstances of regained freedom that characterized postwar Germany. And yet Habermas’s career is fascinating precisely because it amounts to more than a corpus of scholarly work, however original and influential that may be. For here is someone who continually left the protective space of the university in order to assume the role of a participant in controversial public debates – from the significance of the Holocaust to the future of Europe – and in this way sought to influence the development of social and political life in an arena

much broader than the academy. The significance and virtuosity of Habermas's many writings over the years are also fully and expertly documented, ranging from his early work on the public sphere to his more recent writings on communicative action, cosmopolitanism and the postnational condition. What emerges from this biography is a vivid portrait of one of the great public intellectuals of our time Ð a unique thinker who has made an immense and lasting philosophical contribution but who, when he perceives that society is not living up to its potential for creating free and just conditions for all, becomes one of its most rigorous and persistent critics.

A prize-winning poet argues that blackness acts as the caesura between human and nonhuman, man and animal. Throughout US history, black people have been configured as sociolegal nonpersons, a subgenre of the human. *Being Property Once Myself* delves into the literary imagination and ethical concerns that have emerged from this experience. Each chapter tracks a specific animal figure—the rat, the cock, the mule, the dog, and the shark—in the works of black authors such as Richard Wright, Toni Morrison, Zora Neale Hurston, Jesmyn Ward, and Robert Hayden. The plantation, the wilderness, the kitchenette overrun with pests, the simultaneous valuation and sale of animals and enslaved people—all are sites made unforgettable by literature in which we find black and animal life in fraught proximity. Joshua Bennett argues that animal figures are deployed in these texts to assert a theory of black sociality and to combat dominant claims about the limits of personhood. Bennett also turns to the black radical tradition to challenge the pervasiveness of antiblackness in discourses surrounding the environment and animals. *Being Property Once Myself* is an incisive work of literary criticism and a close reading of undertheorized notions of dehumanization and the Anthropocene.
