date information on learning and teaching, and how to relate this information to the task of teaching aeronautical knowledge and skills to students. Experienced aviation instructors will also find the updated information useful for improving their effectiveness in training activities. While this handbook primarily uses the traditional term "student" to denote someone who is seeking certification in aviation, the accepted term in educational psychology is "learners."

A vital resource for pilots, instructors, and students, from the most trusted source of aeronautic information.

Designed for ground instructors, flight instructors, and aviation maintenance instructors, this Aviation Instructor's Handbook was developed by the Federal Aviation Administration (FAA) in cooperation with aviation educators and industry to help beginning instructors understand and apply the fundamentals of instruction. It provides up-to-date information on learning and teaching and how to apply this to the task of teaching aeronautical knowledge and skills to learners. Experienced aviation instructors will also find the information useful for improving their effectiveness in training activities. This book is a key reference tool to all the information necessary for operating as an authorized instructor and passing the Fundamentals of Instructing (FOI) FAA Knowledge Exam. Subjects covered include risk management and single-pilot resource management, human behavior, the learning process, effective communication, the teaching process, assessments,

planning instructional activity, instructor responsibilities and professionalism, and techniques of flight instruction. Appendices include a comprehensive bibliography of references, information on how to develop a test item bank, certificates and ratings endorsements, and a personal minimums checklist. This new edition expands and updates the existing material, including scenario-based training relative to assessments, the submission process of an Airman Certificate and/or Rating application through IACRA, and endorsements. It also incorporates new areas of safety concerns and technical information not previously covered, such as referencing the Airman Certification Standards (ACS) alongside the Practical Test Standards (PTS), teaching practical risk management during flight instruction, and information for Remote Pilots. This book is the official FAA source for teaching flight and many test questions for the FAA Knowledge Exams for instructors come from this reference. Complete with chapter summaries; detailed, full-color drawings and photographs throughout; and a glossary and index.

This fourth edition is the complete manual for flight instructors, with instructional methods for teaching pre-solo maneuvers, to the first solo flight, through certification. Describes what to expect from students and what they expect from their instructors.

Compiled by the Federal Aviation Administration, this handbook is the ultimate technical manual for any flight instructor who must teach inexperienced students

how to fly helicopters. Whether your course ends in students receiving private, commercial, or flight instructor pilot certificates, this book is more than just essential reading—it's the best possible study guide available, and its information can be life-saving. This handbook conforms to flight instructor pilot training and certification concepts established by the FAA. In authoritative and easy-to-understand language, here are explanations of general aerodynamics and the aerodynamics of flight, navigation, communication, flight controls, flight maneuvers, emergencies, and more. Also included is an extensive glossary of terms ensuring that even the most technical language can be easily understood. The Helicopter Instructor's Handbook is an indispensable text for any flight instructor who wants his or her students to operate a helicopter safely in a range of conditions. Chapters cover a variety of subjects including helicopter components, weight and balance, basic flight maneuvers, advanced flight maneuvers, emergencies and hazards, aeronautical decision making, night operations, and many more. With full-color illustrations detailing every chapter, this is a one-of-a-kind resource for instructors and their future pilots.

The Aviation Instructor's Handbook is a world-class educational reference tool developed and designed for ground instructors, flight instructors, and aviation maintenance instructors. This information-packed handbook provides the foundation for beginning instructors to understand and apply the fundamentals of instructing. It also provides aviation instructors with detailed, up-to-date

operations, and many more. With full-color illustrations detailing every chapter, this is a one-of-a-kind resource for pilots and would-be pilots.

The Glider Flying Handbook is designed as a technical manual for applicants who are preparing for glider category rating and for currently certificated glider pilots who wish to improve their knowledge. Certificated flight instructors will find this handbook a valuable training aid, since detailed coverage of aeronautical decision-making, components and systems, aerodynamics, flight instruments, performance limitations, ground operations, flight maneuvers, traffic patterns, emergencies, soaring weather, soaring techniques, and cross-country flight is included. Topics such as radio navigation and communication, use of flight information publications, and regulations are available in other Federal Aviation Administration (FAA) publications. The discussion and explanations reflect the most commonly used practices and principles. Occasionally, the word "must" or similar language is used where the desired action is deemed critical. The use of such language is not intended to add to, interpret, or relieve a duty imposed by Title 14 of the Code of Federal Regulations (14 CFR). Persons working towards a glider rating are advised to review the references from the applicable practical test standards (FAA-G-8082-4, Sport Pilot and Flight Instructor with a Sport Pilot Rating Knowledge Test Guide, FAA-G-8082-5, Commercial Pilot Knowledge Test Guide, and FAA-G-8082-17,

Recreational Pilot and Private Pilot Knowledge Test Guide). Resources for study include FAA-H-8083-25, Pilot's Handbook of Aeronautical Knowledge, FAA-H-8083-2, Risk Management Handbook, and Advisory Circular (AC) 00-6, Aviation Weather For Pilots and Flight Operations Personnel, AC 00-45, Aviation Weather Services, as these documents contain basic material not duplicated herein. All beginning applicants should refer to FAA-H-8083-25, Pilot's Handbook of Aeronautical Knowledge, for study and basic library reference. It is essential for persons using this handbook to become familiar with and apply the pertinent parts of 14 CFR and the Aeronautical Information Manual (AIM). The AIM is available online at www.faa.gov. The current Flight Standards Service airman training and testing material and learning statements for all airman certificates and ratings can be obtained from www.faa.gov. This handbook supersedes FAA-H-8083-13, Glider Flying Handbook, dated 2003. Always select the latest edition of any publication and check the website for errata pages and listing of changes to FAA educational publications developed by the FAA's Airman Testing Standards Branch, AFS-630.
