A selection from the much-praised climate change primer *Global Weirdness*, written by Climate Central, the nonprofit, nonpartisan source for all things climate-related: a straightforward, unbiased, peer-reviewed, roll-up-your-sleeves practical account of what we can expect from climate change in the future. Over the last

Read PDF Global Weirdness Severe Storms

Several decades, human greenhouse gas emissions have begun to change the global climate. We know this for a fact, as we know other facts like the existence of CO₂ in the atmosphere caused by burning fossil fuels such as coal, oil and natural gas; the rising levels of that CO₂ in the atmosphere; the rising temperatures and sea levels
