installing and using the Command Control Interface (CCI) software for Hitachi RAID storage systems. CCI enables the user to configure, perform, and manage operations for the following data management/business

Hitachi Command Control Interface (CCI) User and Reference ...

The Command Control Interface (CCI) software product provides command line control for ShadowImage, SnapShot, Synchronous Remote Copy (TrueCopy), and Asynchronous Remote Copy (TCE) operations on the AMS array by issuing commands from the system hosts to the AMS array. The CCI software interfaces with the system software and high-availability (HA) software on the system hosts as well as with the TrueCopy, TCE, ShadowImage, or SnapShot software on the array.

Command Control Interface (CCI) - Hitachi Vantara Knowledge

This guide provides information about managing the supported storage subsystems attached to the server/cluster. The guide includes information about tiered storage, storage pools, system drives (SDs), using Hitachi Dynamic Provisioning (HDP) with the server, and other storage-related configuration and management features and functions.

Hitachi Vantara Support helps you to manage support cases, download products and tools, answers your queries with community conversations and provides learning with its training and certifications.

Hitachi Vantara Support

Hitachi HUR storage management uses Command Control Interface (CCI) operations from the AIX® operating system and GDR environment. The KSYS subsystem uses CCI to discover and integrate the Hitachi storage replication into the disaster recovery framework of GDR. This integration manages disaster recovery for applications that use the mirrored storage.
