Newly revised and updated, *Film Lighting* is an indispensable sourcebook for the aspiring and practicing cinematographer, based on extensive interviews with leading cinematographers and gaffers in the film industry. Film lighting is a living, dynamic art influenced by new technologies and the changing styles of leading cinematographers. A combination of state-of-the-art technology and in-depth interviews with industry experts, *Film Lighting* provides an inside look at how cinematographers and film directors establish the visual concept of the film and use the lighting to create a certain atmosphere. Kris Malkiewicz uses firsthand material from the experts he interviewed while researching this book. Among these are leading cinematographers Dion Beebe, Russell Carpenter, Caleb Deschanel, Robert Elswit, Mauro Fiore, Adam Holender, Janusz Kaminski, Matthew Libatique, Rodrigo Prieto, Harris Savides, Dante Spinotti, and Vilmos Zsigmond. This updated version of *Film Lighting* fills a growing need in the industry and will be a perennial, invaluable resource.

creative and operational challenges they face in their rapidly evolving industry. Providing respected and clear coverage of the process of programming automated lighting fixtures, the author brings the designer from basic principles to preproduction preparations. Concepts, procedures, and guidelines to ensure a successful production are covered as well as troubleshooting, much needed information on work relationships, and technology including LED lighting, console networking, digital lighting, and more. Chapters are peppered with advice and war stories from some of the most prominent lighting designers of today.

Stagecraft Fundamentals Second Edition tackles every aspect of theatre production with Emmy Award-winning author Rita Kogler Carver's signature witty and engaging voice. The history of stagecraft, safety precautions, lighting, costumes, scenery, career planning tips, and more are discussed, illustrated by beautiful color examples that display step-by-step procedures and the finished product. This second edition offers even more in-demand information on stage management, drawing and drafting (both by hand and CAD), lighting fixtures, and special effects. Also new to this edition are current articles from Lighting and Sound America, brand new diagrams that illustrate hard-to-grasp concepts, and a plethora of information on European conversions, standards, and

practices, making the skills you learn applicable to stage jobs on either side of the ocean! The accompanying website, www.stagecraftfundamentals.com is bursting with additional material such as an instructor's manual, exercises and study questions that coincide with chapters from the book, CAD drawings, color theory, manufacturing information, and so much more to help you along the way as you learn all about the world of theatre production! Praise for the Book: Beautifully written! The author has succeeded in relaying technical theatre information without being too technical and putting the reader to sleep. I read three sentences and instantly knew this book was for me and the way I teach. When I think back on the insufferable intro to tech theatre books I had to read, I feel cheated I didn't have this one as a student. I will be using this text in my class! -- Rob Napoli, Designer and Technical Director at Penn State University, Berks Campus This text has tempted me to return to teaching with a textbook for the first time in seven years. The language is both accessible and informal yet the text goes a long way in debunking some of the typical jargon that may alienate students just getting into the field, or trying it out for the first time. The illustrations (the text is full of them) coupled with the stories reinforce the fundamental information being conveyed. -- John Paul Devlin, Associate Professor of Theatre at Saint

Michael's College What a great idea! Thank heavens someone is doing this for students at that impressionable age. That has been one of my mantras - education of teachers and students on the use of scenic materials. The teachers don't have enough time in college to learn and do everything they have to teach. Most get thrown into the theatre area by default and struggle with designing/building/painting the scenery. -- Jenny Knott, Rosco Stagecraft Fundamentals is beautifully illustrated throughout, and the profusion of color on every page gives this textbook the appearance of a coffee table book. The writing is clear and personal, which should be very appealing to students. Rita Carver covers all aspects of theatre production from scenery, to lighting, to an actor's makeup. Her close ties to the New York theatre scene gives this book a special insight into the professional world, one that goes well beyond what is found in most college textbooks. -- John Holloway, Professor in the Theatre Department at the University of Kentucky and President of the International Association of Theatrical stage Employees (IATSE) Local 346. I can't thank you enough for Stagecraft Fundamentals. I have been teaching stagecraft since 1976 and you have saved me from the nightmare of writing a text to suit my class needs....After two semesters with your text, I have found that I had more time to develop the skills necessary within the classroom than before.

getting work in the profession (Chapter 28), and mirrors the best of real-world practices. Vibrant color production photographs support the text and spotlight examples of contemporary work. The book retains its strong emphasis on modern technology, with many changes in the lighting design and sound design chapters, reflecting the latest practices. The text also includes an expanded section on television design, as well as an emphasis on health and safety issues. The authors emphasize collaboration in all sections of the text, and they provide insight via interviews with professional lighting and scenery designers in two features: Working Professionals and Designers at Work. Reflecting current professional practice, SCENE DESIGN AND STAGE LIGHTING, Tenth Edition, offers in-depth coverage of a broad range of topics, making it the most detailed and comprehensive text available in the scenic, lighting, and sound design fields.
