Taiwan's working class has been shaped by Chinese tradition, by colonialism, and by rapid industrialization. This book defines that class, explores that history, and presents with sensitive honesty the life experiences of some of its women and men. Hill Gates first provides a solid and informative introduction to Taiwan's history, showing how mainland China, Japan, the convulsions of twentieth-century wars, and the East Asian economic expansion

interacted in forming Taiwanese urban life. She introduces nine individuals from Taiwan's three major ethnic groups to tell the stories of their lives in their own words. The narrators include a fortuneteller, a woman laborer, and a retired air force mechanic. A former spirit medium and a janitor are among the others who speak.

Can machines write books? Can artificial intelligence be used for business? Will touch screens be around, or will they be replaced by voice recognition? What are deepfakes? How do self-driving cars work, and are they going to be a reality soon? These questions all come to light in this brief but informational book about artificial intelligence. Society is changing quickly because of automated systems in place that either benefit or undermine people's living style, jobs, and brains. Today, we explore what that future may hold. We will also look into options for civilians in today's modern world to adapt more quickly. Don't underestimate the rise of artificial intelligence. Understand the future.
