Three-Act Tasks. A Three-Act Task is a lesson structure designed specifically to engage children in modeling with mathematics. The activity was created by Dan Meyer, a former high school math teacher and blogger. Teachers around the country are trying these tasks with students and sharing what they've learned.

Modeling With Mathematics - Teaching Channel

So we were able to grapple with our misunderstanding about modeling with mathematics, and the teachers were able to discuss how to integrate modeling with mathematics into their daily instruction. Modeling with mathematics is simply the application of mathematics (and engineering) using

MATHEMATICAL MODELLING FOR CHILDREN TODAY

Mathematical modelling is frequently viewed as the construction of a link or bridge between mathematics as a way of making sense of our physical and social world, and mathematics as a set of abstract, formal structures (Greer, 1997; Mukhopadhyay & Greer,

2001).

Mathematical Modelling With Young Learners  
The Modeling with Data Casebook was developed as the key resource for participants' Developing Mathematical Ideas seminar experience. The twenty-eight cases, written by teachers describing real situations and actual student thinking in their classrooms, provide the basis of each session's investigation of specific mathematical concepts and teaching strategies.
