The U.S. government supports programs to combat global HIV/AIDS through an initiative that is known as the President's Emergency Plan for AIDS Relief (PEPFAR). This initiative was originally authorized in the U.S. Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 and focused on an emergency response to the HIV/AIDS pandemic to deliver lifesaving care and treatment in low- and middle-income countries (LMICs) with the highest burdens of disease. It was subsequently reauthorized in the Tom Lantos and Henry J. Hyde U.S. Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008 (the Lantos-Hyde Act). Evaluation of PEPFAR makes recommendations for improving the U.S. government's bilateral programs as part of the U.S. response to global HIV/AIDS. The overall aim of this evaluation is a forward-looking approach to track and anticipate the evolution of the U.S. response to global HIV to be positioned to inform the ability of the U.S. government to address key issues under consideration at the time of the report release.

Project Management and Engineering is an emergent area. Projects have a tendency to grow in size, involve more stakeholders, and be of greater environmental, organizational and technological complexity. They must also fulfil continuously increasing requirements. This causes greater demands on the effectiveness of Project Engineering and the efficiency of Project Management. This volume brings together a collection of recent work by researchers and professionals in the fields of project management and design in civil engineering, environmental engineering, energy efficiency, rural development, production and process engineering, industrial design and information technology and communication.

This is a print on demand edition of a hard to find publication. Presents the annual estimates of rates and levels of violent crime (rape or sexual assault, robbery, aggravated assault, and simple assault), property crime (burglary, motor vehicle theft, and property theft), and personal theft (pocket picking and purse snatching). It describes the year-to-year change from 2008 and trends for the 10-year period from 2000 through 2009. The Nat. Criminal Victimization Survey collects information on non-fatal crimes, reported and not reported to the police, against persons age 12 or older from a nationally representative sample of U.S. households. This report also includes data on the characteristics of victims of crime; estimates of intimate partner violence; and use of firearms and other weapons during the crime. Illustrations.

SAT Subject Tests are a valuable way to help students show colleges a more complete picture of their academic background and interests. Each year, over 200K high school students take a math SAT

Subject Test to demonstrate their knowledge and showcase their achievement. Many of today ' s careers require STEM skills, and SAT Subject Tests can provide a fair and reliable measure of students ' achievement in math in high school. This information can often enhance a student ' s college admission portfolio. Several colleges and universities also require or recommend students to take SAT Subject Tests for admission and/or placement. The Official SAT Subject Test in Mathematics Level 2 Study Guide from the College Board is the only source of official questions and answer explanations for these exams. Created from the makers of the Subject Tests, this guide offers a total of four (two never-been released) forms of real past Math exams for students to gain real practice. Students will gain valuable experience and raise their confidence by taking practice tests, learning about test structure, and gaining a deeper understanding of what is tested on the test. The Official SAT Subject Test in Mathematics Level 2 Study Guide will help students get ready for the test with:

- 4 full-length, previously administered tests in Math Level 2
- Detailed answer explanations for every question in all tests
- Exclusive test-taking approaches and tips

This book was developed in order to deliver a unit standards-based curriculum that is in line with the National Qualifications-Framework (NQF).

Dispositions are everywhere. We say that a wall is hard, that water quenches thirst and is transparent, that dogs can swim and oak trees can let their leaves fall, and that acid has the power to corrode metals. All these statements express attributions of dispositions, be they physical, physiological or psychological, yet there is much philosophical debate about how far, if at all, dispositional predicates can have complete meaning or figure in causal explanations. This collection of essays, by leading international researchers, examine the case for realism with respect to dispositions and causal powers in both metaphysics and science. Among the issues debated in this book is whether dispositions can be analyzed in terms of conditionals, whether all dispositions have a so-called categorical basis and, if they do, what is the relation between the disposition and its basis.
