With energy sustainability at the forefront of public discussion worldwide, there is a vital requirement to foster an understanding of safe alternative sources of energy such as solar and wind power. Tailored to

# Read PDF Non Conventional

the requirements of undergraduate students of engineering, Non-conventional Energy Resources provides a comprehensive coverage of the basic principles, working and utilization of all key renewable power sources—solar, wind, hydel, biomass, hyower and fuel cells. The book also consists of several solved and

# Read PDF Non Conventional

unsolved questions for  
thorough practice and  
revision.

There has been an enormous increase in the demand for energy as a result of industrial development and population growth. Due to the depletion of fossil fuels at a rapid pace, harnessing the power of clean, alternative energy

# Read PDF Non Conventional

resources has become a necessity. Thus, the book aims to increase awareness among readers about the renewable energy resources and the technologies used to harness them. Written in a lucid and precise manner, the text matter is structured in the question–answer format supported with

# Read PDF Non Conventional

numerous examples and illustrations. Besides discussing various renewable energy sources such as solar, wind, biogas, hydrogen, thermoelectric, tidal, geothermal, wave and thermal, the book also discusses energy management and environment and outlines Kyoto Protocol. The book caters to the

# Read PDF Non Conventional

needs of undergraduate  
engineering students of  
all branches.

Energy is the hottest  
topic of concern in the  
world today. Fast  
receding stocks of  
conventional resources  
impelled governments  
worldwide to include  
renewable energy  
sources in their energy  
programmes. Newer,

# Read PDF Non Conventional

non-conventional methods need to be developed before the conventional stocks are totally exhausted. More and more universities in India are including the studies on renewable, non-conventional resources in their curricula in the 4th year of their BE/BTech (Mechanical) programmes. This book

beginning the discussion  
and offers insightful  
questions in the end.

Renewable energy is  
going to be a very  
important part of the  
whole energy chain and  
its know-how will be  
essential at various  
levels of education,  
especially in science and  
engineering.

Considering this fact,  
this book will also serve

# Read PDF Non Conventional
