This Short Cut is written to assist you, an Oracle Clinical Developer, with many of the tasks and decisions you may encounter on an occasional basis. These tasks involve study setup and maintenance, account maintenance, handling discrepancies, preparing data sets for analysis, batch-loading data, altering system-level settings and defining standard processes. A working knowledge of screen setup and procedure coding is assumed. Remote Data Capture (RDC), which moves data entry from the CRO or pharmaceutical company to the sites, is fast becoming the preferred way to gather and clean data for clinical trials. Thus, RDC, in either Classic or PDF form is frequently discussed here; however, occasionally traditional OC data entry methods will be noted. Ideally, you will have a general programming background as well as a strong knowledge of clinical trials and PL/SQL.

Oracle Performance Survival Guide A Systematic Approach to Database Optimization The fast, complete, start-to-finish guide to optimizing Oracle performance Oracle Performance Survival Guide offers a structured, systematic, start-to-finish methodology for optimizing Oracle performance as efficiently as possible. Leading Oracle expert Guy Harrison shows how to maximize your tuning investment by focusing on causes rather than symptoms, and by quickly identifying the areas that deliver the greatest bang for the buck. Writing for DBAs and developers with all levels of experience, Harrison covers every area of Oracle performance management, from application design through SQL tuning, contention management through memory and physical IO management. He also presents up-to-the-minute guidance for optimizing the performance of the Oracle 11g Release 2. You'll start by mastering Oracle structured performance tuning principles and tools, including techniques for tracing and monitoring Oracle execution. Harrison illuminates the interaction between applications and databases, guides you through choosing tuning tools, and introduces upfront design techniques that lead to higher-performance applications. He also presents a collection of downloadable scripts for reporting on all aspects of database performance. Coverage includes

- Tuning by layers, the most effective, highest-value approach to Oracle performance optimization
- Making the most of Oracle's core tools for tracing, monitoring, and diagnosing performance
- Highly efficient database logical and physical design, indexing, transaction design, and API use
- SQL and PL/SQL tuning, including the use of parallel SQL techniques
- Minimizing contention for locks, latches, shared memory, and other database resources
- Optimizing memory and physical disk IO
- Tuning Real Application Cluster (RAC) databases

An up-to-date and comprehensive overview of information and database systems design and implementation. The book provides an accessible presentation and explanation of technical architecture for systems complying with TOGAF standards, the accepted international framework. Covering nearly the full spectrum of architectural concern, the authors also illustrate and concretize the notion of traceability from business goals, strategy through to technical architecture, providing the reader with a holistic and commanding view. The work has two mutually supportive foci. First, information technology technical architecture, the in-depth, illustrative and contemporary treatment of which comprises the core and majority of the book; and secondly, a strategic and business context.
