"Get the most out of your Treo 700w smartphone using Windows Mobile software with this handy pocket guide full of time-saving tips and techniques."--Cover.

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

This is the origin story of technology super heroes: the creators and founders of ARM, the company that is responsible for the processors found inside 95% of the world's mobile devices today. This is also the evolution story of how three companies - Apple, Samsung, and Qualcomm - put ARM technology in the hands of billions of people through smartphones, tablets, music players, and more. It was anything but a straight line from idea to success for ARM. The story starts with the triumph of BBC Micro engineers Steve Furber and Sophie Wilson, who make the audacious decision to design their own microprocessor - and it works the first time. The question becomes, how to sell it? Part I follows ARM as its founders launch their own company, select a new leader, a new strategy, and find themselves partnered with Apple, TI, Nokia, and other companies just as digital technology starts to unleash mobile devices. ARM grows rapidly, even as other semiconductor firms struggle in the dot com meltdown, and establishes itself as a standard for embedded RISC processors. Apple aficionados will find the opening of Part II of interest the moment Steve Jobs returns and changes the direction toward fulfilling consumer dreams. Samsung devotees will see how that firm evolved from its earliest days in consumer electronics and semiconductors through a philosophical shift to innovation. Qualcomm followers will learn much of their history as it plays out from satellite communications to development of a mobile phone standard and emergence as a leading fabless semiconductor company. If ARM could be summarized in one word, it would be "collaboration." Throughout this story, from Foreword to Epilogue, efforts to develop an ecosystem are highlighted. Familiar names such as Google, Intel, Mediatek, Microsoft, Motorola, TSMC, and others are interwoven throughout. The evolution of ARM's first 25 years as a company wraps up with a shift to its next strategy: the Internet of Things, the ultimate connector for people and devices. Research for this story is extensive, simplifying a complex mobile industry timeline and uncovering critical points where ARM and other companies made fateful and sometimes surprising decisions. Rare photos, summary diagrams and tables, and unique perspectives from insiders add insight to this important telling of technology history.

All 13 volumes of Joseph Delaney's internationally best-selling fantasy adventure series, The Last Apprentice, plus the two short story collections and The Spook's Bestiary—all together for the first time! Tom Ward is the seventh son of a seventh son. As the Spook's apprentice, he will face boggarts, witches, ghosts, and other terrifying creatures of the night. Other apprentices have come before him. Some have failed. Some have fled. Some have died. Will Tom be the one who survives—especially when he becomes the target of the world's greatest evils? Includes 16 books set in the world of the acclaimed series that inspired the major motion picture Seventh Son. Revenge of the Witch (Book 1) Curse of the Bane (Book 2) Night of the Soul Stealer (Book 3) Attack of the Fiend (Book 4) Wrath of the Bloodeye (Book 5) Clash of the Demons (Book 6) Rise of the Huntress (Book 7) Rage of the Fallen (Book 8) Grimalkin the Witch Assassin (Book 9) Lure of the Dead (Book 10) Slither (Book 11) I Am Alice (Book 12) Fury of the Seventh Son (Book 13) The Spook's Tale and Other Horrors (short story collection) Coven of Witches (short story collection) The Spook's Bestiary: The Guide to Creatures of the Dark (illustrated companion book)

Data Science is booming thanks to R and Python, but Java brings the robustness, convenience, and ability to scale critical to today's data science applications. With this practical book, Java software engineers looking to add data science skills will take a logical journey through the data science pipeline. Author Michael Brzustowicz explains the basic math theory behind each step of the data science process, as well as how to apply these concepts with Java. You'll learn the critical roles that data IO, linear algebra, statistics, data operations, learning and

prediction, and Hadoop MapReduce play in the process. Throughout this book, you'll find code examples you can use in your applications. Examine methods for obtaining, cleaning, and arranging data into its purest form Understand the matrix structure that your data should take Learn basic concepts for testing the origin and validity of data Transform your data into stable and usable numerical values Understand supervised and unsupervised learning algorithms, and methods for evaluating their success Get up and running with MapReduce, using customized components suitable for data science algorithms

Four hostages are rescued from a group of religious extremists in Barcelona. After five years of being held captive together, they make a vow to always watch out for one another. But they never expected this. The world they have returned to has been transformed-by water. And the water is rising.

Proceedings of the first meeting of the International Geographic Union Global Database Planning Project, held at Tynney Hall, Hampshire, UK, May 1988. Summarizes current work of national and international agencies responsible for environmental monitoring and modelling. Examines the philosophical, methodological, technical, legal and organizational problems associated with running these databases; defines the shortcomings and advantages of selected data sources; presents an overview of future developments. No index. Annotation copyrighted by Book News, Inc., Portland, OR

Hugo Award winner Emma Newman returns to the captivating Planetfall universe with a dark tale of a woman stationed on Mars who starts to have doubts about everything around her. After months of travel, Anna Kubrin finally arrives on Mars for her new job as a geologist and de facto artist in residence--and already she feels she is losing the connection with her husband and baby at home on Earth. In her room on the base, Anna finds a mysterious note, painted in her own hand, warning her not to trust the colony psychiatrist. A note she can't remember painting. When she finds a footprint in a place that the colony AI claims has never been visited by humans, Anna begins to suspect that she is caught up in an elaborate corporate conspiracy. Or is she losing her grip on reality? Anna must find the truth, regardless of what horrors she might discover or what they might do to her mind.

July 15 - August 12, Bogazici University Campus eNTERFACE'07 took place in Istanbul, at the campus of the Bogazici University. The one month long workshop was attended by 140 people. The workshop was organized around 12 well-defined projects, as the...
