Effective communication is at the heart of medical profession, whether it is patient-doctor communication, interpersonal communication, or communication with the scientific and research community. However, medical professionals are not adequately trained in these skills, and when it comes to presentations, the message is often lost due to inadequate preparation, ineffective slides, and a generally unconvincing performance by the presenter. This book addresses all aspects of the communication skills required by individuals entering medical school as well as professionals farther up the career ladder. Each chapter offers a quote or a statement that captures the essence of the text. Adopting a unique approach known as A, B, C, D and E (Assess Need, Brief, Contextualize, Describe and Evaluate) the book includes abundant illustrations, real-world case scenarios, anecdotes, tables, graphs and cartoons, as well as practical information, and tips on communicating effectively. As such it is a valuable resource for new and experienced clinicians, educators and researchers wanting to improve their communications skills.
