It comprises the most important surgical approaches in the field, presenting step by step procedures in a clear and didactic way. However, the choice for the right surgical procedure to treat those conditions may vary, provided the diversity on possible techniques, clinical presentations and complexity. Robotic surgery has emerged in recent years as an important tool to increase the number of surgical approaches for the surgeon who faces abdominal wall hernias. Video-assisted and robotic surgery may represent a consistent improvement in options available for the surgeon involved in wall hernia repair.
