When a young woman appears during a violent storm and sets in motion a series of events that endangers the very fabric of magic, the Knights of Falador, who guard the kingdom of Asgarnia with their lives, must solve an ancient riddle or lose everything. Original. 40,000 first printing. Video game tie-in.

The city of Varrock is at breaking point; people are fleeing from the country into the already full city and riots are breaking out as the government struggles to keep order. Meanwhile Gar'rth struggles with his dark destiny. Theodore chases a holy relic and Kara prepares for war. As the friends continue to fight against evil, Zamorak's power continues to rise, bringing with it the walking dead... The third, thrilling novel in the Runescape series.

Varrock is the greatest human city in the world, yet it is filled with dangerous secrets. People are being taken by an inhuman abductor. Its victims are murdered... or worse, spirited away to Morytania, where vampires rule. As unrest against the crown grows, the King chooses to send the now-famous Kara-Meir and her friends across the holy river into Morytania, the land of the dead.

Presents a broad examination of the nature of virtual worlds and the potential they provide in managing and expressing information practices through that medium, grounding information professionals and students of new media in the fundamental elements of virtual worlds and online gaming. The book details the practical issues in finding and using information in virtual environments and presents a general theory of librarianship as it relates to virtual gaming worlds. It is encompassed by a set of best practice methods that libraries can effectively execute in their own environments, meeting the needs of this new generation of library user, and explores ways in which information literacy can be approached in virtual worlds. Final chapters examine how conventional information evaluation skills work falls short in virtual worlds online. Maps out areas of good practice and technique for information professionals and librarians serving in virtual communities Provides a clear foundation with appropriate theory for understanding information in virtual worlds Treats virtual worlds as "real environments" and observes the behaviour of actors within them
