This book places islanders' struggles and knowledge at the forefront of island studies. Written by experts from diverse fields and locations, it covers a wide range of topics, from the history of island studies to critical ocean studies. In remapping the field of island studies from Okinawa, an emerging hub of community-based knowledge and interdisciplinary collaboration between leading critics and theorists in geography, linguistics, tourism, literature, international relations, and peace studies reveals the challenges for the future of island studies. The book consists of two parts: the first offers a collection of individual contributions that demonstrate the vital role that the field's interdisciplinarity can play in creating bridges between the political and social issues islanders and the islands face and the disciplines involved. The second part provides a cross-disciplinary discussion between the authors and scholars of island studies in Okinawa, including local experts, and suggests new ways to think about the future of island studies that are intricately linked to islanders' agency, preservation of languages and heritage, and the security of the islands. As such, the book directly addresses the current state of the field as well as with its future.

Splendid early novel (1918) evokes the Nebraska prairie life of the author's childhood, and touchingly commemorates the spirit and courage of the immigrant pioneers who settled the land.

Records the courage and self-reliance of an Indian girl who lived alone for eighteen years on an isolated island off the California coast when her tribe emigrated and she was left behind.

Golding's iconic 1954 novel, now with a new foreword by Lois Lowry, remains one of the greatest books ever written for young adults and an unforgettable classic for readers of any age. This edition includes a new Suggestions for Further Reading by Jennifer Buehler. At the dawn of the next world war, a plane crashes on an uncharted island, stranding a group of schoolboys. At first, with no adult supervision, their freedom is something to celebrate. This far from civilization they can do anything they want. Anything. But as order collapses, as strange howls echo in the night, as terror begins its reign, the hope of adventure seems as far removed from reality as the hope of being rescued.

Supporting Inclusion: School Administrators' Perspectives and Practices provides significant insights that arm the reader with a variety of ideas and easy-to-implement applicable strategies gleaned from knowledgeable contemporaries. This book details various approaches taken by administrators as they transitioned their schools from a segregated resource environment to an inclusive framework.

This book is the outstanding and most frequently cited work in the field of Anthropology. It made the author world-famous and established her as the leader in her field for the next 50 years. One of the reasons this book became so famous was her observation that young Samoan women deferred marriage for many years while enjoying casual sex before eventually choosing a husband. This led to the Sexual Revolution that swept America in the 1960s and brought about the establishment of the Sexual Freedom League and other organizations. The Free Love generation idolized Margaret Mead.

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

From the author of Guns, Germs and Steel, Jared Diamond's Collapse: How Societies Choose to Fail or Survive is a visionary study of the mysterious downfall of past civilizations. Now in a revised edition with a new afterword, Jared Diamond's Collapse uncovers the secret behind why some societies flourish, while others founder - and what this means for our future. What happened to the people who made the forlorn long-abandoned statues of Easter Island? What happened to the architects of the crumbling Maya pyramids? Will we go the same way, our skyscrapers one day standing derelict and overgrown like the temples at Angkor Wat? Bringing together new evidence from a startling range of sources and piecing together the myriad influences, from climate to culture, that make societies self-destruct, Jared Diamond's Collapse also shows how - unlike our ancestors - we can benefit from our knowledge of the past and learn to be survivors. 'A grand sweep from a master storyteller of the human race' - Daily Mail 'Riveting, superb, terrifying' - Observer 'Gripping ... the book fulfils its huge ambition, and Diamond is the only man who could have written it' - Economist 'This book shines like all Diamond's work' - Sunday Times

A monster assembled by a scientist from parts of dead bodies develops a mind of his own as he learns to loathe himself and hate his creator. Shelley's suspenseful and intellectually rich gothic tale confronts some of the most important and enduring themes in all of literature-the power of human imagination, the potential hubris of science, the gulf between appearance and essence, the effects of human cruelty, the desire for revenge and the need for forgiveness, and much more.
