Over 25 short story masterpieces from writers such as Louis de Bernières and Ian Rankin - modern literary tales to chill the blood. This spine-chilling new anthology of 20th and 21st century tales by big name writers is in the best traditions of literary ghost stories. It is just a little over a hundred years ago that the most famous literary ghost story, *The Turn of the Screw* by Henry James, was published and in the intervening years a great many other distinguished writers have tried their hand at this popular genre - some basing their fictional tales on real supernatural experiences of their own.

Ten classic stories from the birth of modern science fiction writing *The Golden Age of Science Fiction*, from the early 1940s through the 1950s, saw an explosion of talent in SF writing including authors such as Isaac Asimov, Robert A. Heinlein, and Arthur C. Clarke. Their writing helped science fiction gain wide public attention, and left a lasting impression upon society. The same writers formed the mould for the next three decades of science fiction, and much of their writing remains as fresh today as it was then. Collected in one giant volume, here is the very best of the golden era. The stories include: A.E. van Vogt, 'The Weapons Shop' Isaac Asimov, 'The Big and the Little' Lester del Rey, 'Nerves' Fredric Brown, 'Daymare' Theodore Sturgeon, 'Killdozer!' C.L. Moore, 'No Woman Born' A. Bertram Chandler, 'Giant Killer'

Here are 25 stories of science fiction that push the envelope, by the biggest names in an emerging new crop of high-tech futuristic SF - including Charles Stross, Robert Reed, Alastair Reynolds, Peter Hamilton and Neal Asher. High-tech SF has made a significant comeback in the last decade, as bestselling authors successfully blend the super-science of 'hard science fiction' with real characters in an understandable scenario. It is perhaps a reflection of how technologically controlled our world is that readers increasingly look for science fiction that considers the fates of mankind as a result of increasing scientific domination. This anthology brings together the most extreme examples of the new high-tech, far-future science fiction, pushing the limits way beyond normal boundaries. The stories include: "A Perpetual War Fought Within a Cosmic String", "A Weapon That Could Destroy the Universe", "A Machine That Detects Alternate Worlds and Creates a Choice of Christs", "An Immortal Dead Man Sent To The End of the Universe", "Murder in Virtual Reality", "A Spaceship So Large That There is An Entire Planetary System Within It", and "An Analytical Engine At The End of Time", and "Encountering the Untouchable."

Expanded and with great new stories, this is the biggest and best anthology of ghostly hauntings ever.
