Renowned Harvard scholar and New Yorker staff writer Jill Lepore has composed a strikingly original, ingeniously conceived, and beautifully crafted history of American ideas about life and death from before the cradle to beyond the grave. How does life begin? What does it mean? What happens when we die? "All anyone can do is ask," Lepore writes. "That's why any history of ideas about life and death has to be, like this book, a history of curiosity." Lepore starts that history with the story of a seventeenth-century Englishman who had the idea that all life begins with an egg and ends it with an American who, in the 1970s, began freezing the dead. In between, life got longer, the stages of life multiplied, and matters of life and death moved from the library to the laboratory, from the humanities to the sciences. Lately, debates about life and death have determined the course of American politics. Each of these debates has a history. Investigating the surprising origins of the stuff of everyday life—from board games to breast pumps—Lepore argues that the age of discovery, Darwin, and the Space Age turned ideas about life on earth topsy-turvy. "New worlds were found," she writes, and "old paradises were lost." As much a meditation on the present as an excavation of the past, *The Mansion of Happiness* is delightful, learned, and altogether beguiling.

consequences. After two years of living on cheap beer and little else in a bitterly cold tiny cabin outside an abandoned, crumbling mansion, young programmers Shawn Eagle and Billy Stafford have created something that could make them rich: a revolutionary computer they name Eagle Logic. But the hard work and escalating tension have not been kind to their once solid friendship—Shawn's girlfriend Emily has left him for Billy, and a third partner has disappeared under mysterious circumstances. While Billy walks away with Emily, Shawn takes Eagle Logic, which he uses to build a multi-billion-dollar company that eventually outshines Apple, Google, and Microsoft combined. Years later, Billy is a failure, beset by poverty and addiction, and Shawn is the most famous man in the world. Unable to let the past be forgotten, Shawn decides to resurrect his and Billy's biggest failure: a next-generation computer program named Nellie that can control a house's every function. He decides to set it up in the abandoned mansion they worked near all those years ago. But something about Nellie isn't right—and the reconstruction of the mansion is plagued by accidental deaths. Shawn is forced to bring Billy back, despite their longstanding mutual hatred, to discover and destroy the evil that lurks in the source code. From the internationally bestselling author of the "apocalyptic extravaganza" (Publishers Weekly) *The Hatching* series, this white-knuckled thriller is perfect for fans of Stephen King and Iain Reid.

Robin Ekiss's meditations on memory and mortality are a canary in the coal mine of imagination. With disembodied dolls, dank Parisian catacombs, the gilded interior of a Fabergé egg, and the unfathomable edge of Niagara Falls as the dominion of these poems, reading Ekiss's work is like peering into the perfectly still world of a diorama or daguerreotype: an experience both uncanny and uncompromising.

Trixie's summer is going to be sooo boring with her two older brothers away at camp. But then a millionaire's daughter moves into the next-door mansion, an old miser hides a fortune in his decrepit house, and a runaway kid starts hiding out in Sleepyside!

This is the story of a majestic old mansion built high up in the Irish Hills of Southern Michigan. It was purchased from the state when the builder, who had lived there in seclusion for over sixty years died without a will. As soon as the new owners, Zack and Peggy Sue Heikel moved in, they experienced strange happenings that would eventually lead them to discover a huge old safe hidden in a room in the basement. In the safe were many wierd and fasinating items, fifty-seven canvas bags containing thousands of greenbacks, old weapons, jewelery and a jar containing nine severed human fingers, three with strange rings still attached to the bony ditits. The Heikel's would go on for nine years trying to find the meaning of these things found in the safe and when they do they have life changing events that send them fleeing for their very lives. This tale of terror is based on a TRUE story which in the end of the series results in an untimely death. Only the author knows which of the events are TRUE and which are not, but surprisingly, MOST ARE TRUE.
