The Structure of Evolutionary Theory (2002) is Harvard paleontologist Stephen Jay Gould's technical book on macroevolution and the historical development of evolutionary theory. The book was twenty years in the making, published just two months before Gould's death. Aimed primarily at professionals, the volume is divided into two parts.

The Structure of Evolutionary Theory - Wikipedia

Impressive on many levels, The Structure of Evolutionary Theory represents Gould's all-out attempt to revise and extend evolutionary theory as proposed by Darwin in 1859...Gould's respect and admiration (I would even say, love) for Darwin as a scientist and as a man have been evident throughout all his writings, and this book, which begins and ends with Darwin, is no exception. In stating his motivation for it, Gould leaves no doubt that his goal is not just to explicate evolutionary theory ...

The Structure of Evolutionary Theory: Amazon.co.uk ...

The Structure of Evolutionary Theory. Book Description: The world's most revered and eloquent interpreter of evolutionary ideas offers here a work of explanatory force unprecedented in our time—a landmark publication, both for its historical sweep and for its scientific vision. With characteristic attention to detail, Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism: that natural selection works on ...

The Structure of Evolutionary Theory on JSTOR

656 THE STRUCTURE OF EVOLUTIONARY THEORY differentially, based on interaction of their phenotypes with the environment). If we dissolve interactors into an overall "environment" of the genes, and then average a gene's fitness across all environments- the procedure of gene selectionism-then we lose causality.

The Structure Of Evolutionary Theory

With characteristic attention to detail, Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism: that natural selection works on organisms, not genes or species; that it is almost exclusively the mechanism of adaptive evolutionary change; and that these changes are incremental, not drastic. Next, he examines the three critiques that currently challenge this classic Darwinian edifice: that selection operates on ...

The Structure of Evolutionary Theory — Stephen Jay Gould ...

The historical sections of The Structure of Evolutionary Theory are packed full of evolutionary theory presented in the clearest and most comprehensible way. The avowedly theoretical sections are...

Reviews: The Structure of Evolutionary Theory and I Have ...

of the essential core constituents of neo-Darwinism. The Structure of Evolutionary Theory made me realise that Stephen Jay Gould has two seemingly incompatible sides. Ever since Darwin, Hen's Teeth and Horse's Toes, Bully for Brontosaurus. 'Gould-2' is the critic of evolution who developed punctuated equilibrium and several other points

The Structure of Evolutionary Theory (S.J. Gould). Book ...

The symbiotic evolutionary theory complements Darwinism with a deeper appreciation of the fundamental cooperative processes, which accompanied the origin and evolution of life. Each organism has its own place in the biosphere. It cannot evolve separately; it should coordinate its change with connected species.

Evolutionary Theory - an overview | ScienceDirect Topics

In The Structure of Evolutionary Theory, a monumental labor of academic love, Stephen Jay Gould attempts to define and revise that framework. Using the clear metaphors and personable style he is so well known for, Gould outlines the foundation of the theory and attempts to use it to show that modern evolutionary biology has lost its way.

The Structure of Evolutionary Theory: Gould, Stephen Jay ...

Download Free The Structure Of Evolutionary Theory Stephen Jay Gould

The Structure of Evolutionary Theory Shortly before his death, Gould published The Structure of Evolutionary Theory (2002), a long treatise recapitulating his version of modern evolutionary theory. In an interview for the Dutch TV series Of Beauty and Consolation Gould remarked, "In a couple of years I will be able to gather in one volume my view of how evolution works.

Stephen Jay Gould - Wikipedia

With characteristic attention to detail, Stephen Jay Gould first describes the content and discusses the history and origins of the three core commitments of classical Darwinism: that natural selection works on organisms, not genes or species; that it is almost exclusively the mechanism of adaptive evolutionary change; and that these changes are incremental, not drastic.

The Structure of Evolutionary Theory - Stephen Jay Gould ...

This piece of work deals with the logic of basic structure of evolutionary theory which attempts at reinforcing Gould's views about 1) Hierarchical selection (stressing more on Species selection), 2) Stasis and Punctuated equilibrium and 3) Constraints, Exaptations and Spandrels.

The Structure of Evolutionary Theory by Stephen Jay Gould

Here is a quick description and cover image of book The Structure of Evolutionary Theory written by Stephen Jay Gould which was published in 2002-3-21.
